TECHNICAL EXPERIENCES

Project

Spring 2022

Team leader

- Created a web application for an apartment's laundry system with tenants having personal login ID.
- Created a **GANT** chart to assign roles to members of the project's development team.
- Designed the framework (Entity Relationship and Data Flow Diagrams).
- Designed, developed, and programmed the user interface using **HTML** and **CSS** codes.
- Created a system database by utilizing **MySQL**.
- Pulled and stored tenants' User ID credentials and laundry availability by using **PHP**.
- Updated the source codes and shared them with each developer in the team utilizing a **Git** repository.
- Hosted web application using **AWS** services.

RecProf - project, remote

May 2021 – July 2022

IT Support

- Created the company's website (front-end and back-end) utilizing **WordPress**. Collaborated with stakeholders over Zoom sessions to gather functional requirements and validate site wireframes.
- Recommended site feature improvements by conducting online research for best practices.
- Facilitated the design of book cover (4 books) within a team of 5+ members.
